Gymnázium Hubeného 23
Grammar School · Bratislava III
2018 – 2022

OTHER

- Driver's Licence B

ABOUT ME

IT engineer who genuinely loves what he does. Outside of work I run a personal homelab at bujnatech.com - experimenting with infrastructure, networking, and security the same things I work with daily, just without the deadlines.

WORK EXPERIENCE

- System Engineer** NOW Jan 2026 – Present
INNOVATRICS, S.R.O.
 - Deploy and maintain biometric identity systems (ABIS) for government clients across Africa & Asia on bare-metal and AWS, using Kubernetes (RKE2) and HashiCorp Nomad, including fully air-gapped setups
 - Automated ABIS application deployments and rolling updates via Ansible across single-node or multi-node clusters
 - Set up a full observability stack (Grafana, Loki, Mimir, Tempo) with custom dashboards so teams can see what's actually happening in production
 - Configured a self-managed Apache ActiveMQ broker on AWS EC2 for ABIS client messaging integrations, managed TLS certificates (Let's Encrypt), and served as the main technical contact throughout that deployment
- IT Administrator** Mar 2025 – Jan 2026
INNOVATRICS, S.R.O.
 - Responsible for networking and meeting rooms IT in the new office building, including delivering the full Nokia GPON fibre infrastructure from scratch
 - Evaluated and chose vendors for internet connectivity, GSM indoor coverage, and cabling infrastructure
 - Kept the core stack running: Active Directory, ESET, Freshservice, Dreamhost, Google Workspace, and Cisco L2 switching
 - Handled all software licensing and company-wide procurement as corporate cardholder
- IT Support Specialist** Mar 2024 – Mar 2025
INNOVATRICS, S.R.O.
 - Kept the main platforms running smoothly: Google Workspace, Jira, Confluence, ESET, Freshservice, Active Directory and Yodeck
 - Supported users on Windows and Linux/Unix systems day-to-day
 - Researched, spec'd, and pitched the full AV setup for the new HQ to senior management, then delivered it end-to-end
 - Handled software procurement and licensing for the whole company as corporate cardholder
- L1 Support Engineer** Dec 2023 – Feb 2024
ZENTITY SLOVAKIA S.R.O.
 - Managed Jira and Confluence for the team: user admin, spaces, project configuration
 - Kept Active Directory users and permissions organised and up to date
 - Monitored Linux servers through log reviews and Zabbix, catching issues before they escalated
 - Used Microsoft Azure for log review and cloud diagnostics
- IT Service Desk Specialist** Nov 2022 – Nov 2023
PRICEWATERHOUSECOOPERS SLOVENSKO, S.R.O.
 - Handled IT support for a large professional services firm: hardware, software, anything that came in got resolved quickly
 - Used ServiceNow daily to track, manage, and close incidents across the business
 - Set up and ran all IT equipment for company events, both internal and client-facing
